MOHD IRFAN

Frontend Developer | React / Next.js / AI-Integrated Web Systems

New Delhi, India | +91 98215 58370 | irfanabbasiccx@gmail.com | github.com/IrfanAbbasi22

PROFESSIONAL SUMMARY

Frontend Developer with 5+ years building production React/Next.js interfaces, headless commerce platforms, and AI-integrated lead-generation systems. Recent work centers on connecting frontend applications to conversational AI and automation pipelines, including WhatsApp chatbots, ElevenLabs voice agents, n8n workflow orchestration, and CRM/GraphQL sync layers, moving beyond UI implementation into full-stack system design. Comfortable owning a feature from architecture through shipped product across React, Next.js, Webflow, and WordPress/Shopify ecosystems.

TECHNICAL SKILLS

Frontend: React JS, Next.js, JavaScript (ES6+), TypeScript, Redux, HTML5, CSS3, Sass, Tailwind CSS, Bootstrap, GSAP (animation)
AI & Automation: Conversational AI integration (WhatsApp chatbot flows), ElevenLabs voice agents, n8n workflow automation, intent-based lead routing
Backend & APIs: Node.js, Express, PHP, Laravel, MongoDB, RESTful APIs, GraphQL (Shopify Admin API, metaobject CRUD)
Platforms: Shopify (Liquid, GraphQL, metaobjects), Webflow, WordPress (WooCommerce, headless), LeadSquared CRM integration
Design: Figma, Adobe XD, Adobe Photoshop, Wireframing, Responsive & Adaptive Design
Tools: Git, VS Code, Postman, AWS (basic), npm

PROFESSIONAL EXPERIENCE

Frontend Developer | NexGen Innovators, Delhi, India

Dec 2021 – Present

- Built the frontend and lead-capture flow for **fundassist.ai**, a custom WordPress site where WhatsApp click-throughs trigger an AI chatbot; on qualified intent, n8n routes the conversation to an ElevenLabs voice agent or books an expert call, logging leads to Google Sheets for the sales team, generating **~300+ leads** with an **~70% conversation-to-callback conversion rate**.
- Rebuilt **delhi-ivf.com** from React to **Next.js**, resolving prior SEO and page-speed issues, and integrated a WhatsApp OTP gate to filter bot/spam traffic before it reached the CRM, cutting spam query volume by **~80%** across **100+ genuine leads synced to LeadSquared weekly**.
- Architected a headless artist-management system for **The Centurion Art** (Shopify, Minimog theme, in development): built a Laravel application using the Shopify GraphQL Admin API to create and manage artist **metaobjects** with full CRUD sync, enabling artists to be onboarded and listed without granting direct Shopify admin access. Now extending the system to artist-submitted product listings and order flow.
- Delivered **sproutai.tech** on Webflow with GSAP-driven animation and scroll-based transitions, balancing motion complexity against load performance.
- Developed **HL Giggs**, a headless WooCommerce storefront on Next.js, building custom product pages and dashboards optimized for mobile performance.
- Architected reusable, modular React component libraries across client projects, reducing repeated build effort and easing long-term maintenance.
- Applied performance techniques including lazy loading, dynamic imports, and efficient state management to keep interfaces fast under production load.
- Additional client delivery: Omuni Site Revamp, Art & Dine, Stashinggs, Guide2Go, Vision Media, Mink Lifestyle Retail, spanning responsive UI builds and design-system alignment across sectors.

Jr. Web Developer | Delhi Web Master, Delhi, India

Aug 2020 – Dec 2021

- Built responsive UI layouts with HTML5, CSS3, JavaScript, and Bootstrap across 5+ client projects, ensuring cross-browser consistency.
- Partnered with the design team to translate visual mockups into functional, pixel-accurate interfaces using jQuery for interactive DOM behavior.

EDUCATION

Master of Computer Applications (MCA) (Pursuing), Delhi University, Delhi
Bachelor of Arts, Delhi University, Delhi (2017 - 2020)

RECOGNITION

Rising Star Trophy, NexGen Innovators, 2023 | Certificate of Appreciation, NexGen Innovators, 2024
